EDUCATION

University of Information Technology, VNU-HCM Sep 2024 – Present
Undergraduate student in the Computer Science Honors Program.

Vo Nguyen Giap High School for the Gifted Sep 2021 – June 2024
Specialized in Informatics. Ranked 1st in the school entrance exam and graduated with a GPA of 9.1/10.

AWARDS & ACHIEVEMENTS

Participant, ICPC Asia Pacific Championship, Singapore 2025
Competed at the invitational Asia-Pacific Super-Regional stage of ICPC, gathering top university teams from leading institutions across West Pacific and Southeast Asia.

Second Prize, ICPC Asia Hanoi Regional Contest 2024
Received Second Prize at the ICPC Asia Regional round, earning qualification for the Asia-Pacific Championship.

Second Prize, Vietnam National Olympiad in Informatics 2023 & 2024
Received Second Prize in Vietnam's national Informatics Olympiad for high school students for two consecutive years.

First Prize, Provincial Contest for Excellent Students in Informatics 2022 & 2023
Awarded First Prize in the provincial Informatics contest for two consecutive years.

Finalist, Ho Chi Minh City Artificial Intelligence Challenge 2025
Advanced to the final round of an AI competition focused on large-scale multimedia information retrieval.

Odon Vallet Scholarship Recipient 2023
Received a selective academic scholarship awarded to outstanding Vietnamese students in science and education.

EXPERIENCE

MaskTech Informatics Club | Founder 2024 – Present
MaskTech Informatics Club is a student-led academic club established to promote informatics education and academic activities among students in Quang Binh.

- Designed the problem set and solutions for MaskTech Open 2024, the club's first programming contest, attracting high school contestants across the province.
- Guided younger members and later generations of students through contest preparation and competitive programming practice.

Summer in Engineering and Applied Sciences (SEAS) | Teaching Assistant Jul – Aug 2025
SEAS is a nonprofit summer school in Engineering and Applied Sciences, providing free learning opportunities for high school students through mentorship from graduate students and experts at leading universities and technology companies.

- Supported an intensive 2-week full-day program on Artificial Intelligence and Applications, covering Python programming, linear algebra, statistics and machine learning.
- Assisted students during lectures, coding exercises, and a computer vision project on rain image removal using CycleGAN-based image-to-image translation.
- Worked with mentors from Harvard, MIT, CERN, Stony Brook University, Ericsson Research, UIUC, VinAI, and other leading institutions.
